

Says

What have we heard them say?  
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?

Does

What behavior have we observed?  
What can we imagine them doing?

ABOUT AI

I'm curious and excited to see how AI will change the way we live, work, and solve the world's biggest problems.

I'm both terrified and excited to see how AI will shape our future, from exploring the cosmos to surpassing human intelligence.

I'm interested in learning more about AI and finding tools and resources that can help me use it in my personal and professional life.

To have access to AI-powered tools and resources that are reliable, affordable, and easy to use

To be protected from the potential harms of AI, such as job displacement, bias, and discrimination

That AI will be used to make the world a better place. That AI will help to create new jobs and opportunities

Of a future where AI is used to create a more just, equitable, healthy, fulfilling, and cosmically-aware world.

Impatient: pages load too slowly

Hopefull that the effortys will be Sucessfull

Anxious About choosing the good blog name

Someone who is afraid of job displacement might be more likely to learn new skills and explore new career options.

People read AI blogs and articles to learn more about AI, including its latest developments, trends, and potential applications.

People might also read AI blogs and articles to stay up-to-date on the latest AI news and to get different perspectives on AI from different experts.

People support AI research and development by donating to AI non-profit organizations, attending AI conferences, and participating in AI open source projects.

People might also talk to other people about AI to explore potential collaborations, to network with other AI professionals, or to simply find a community of people who share their interest in AI.

People might also watch AI videos and tutorials to learn about new AI concepts and technologies, or to see how AI is being used in different industries and applications.
